- ❖ **AI Solutions**
- ❖ **Back-End**
- ❖ **Frontend**
- ❖ **Testing**

Problem in Student

01

No Feedback on
rejections

02

Hard to find suitable
roles

03

Limited Professional Network

04

Unclear Career path

What Is The Problem in Hiring Companies?

01

Difficulty assessing soft skills

02

Too many unqualified applications

03

Hiring Costs are high

04

Resume screening takes too much time

Solutions

"InternWay AI-Powered Internship Matching Platform"

- ❖ CV Parsing & Profile Enrichment.
- ❖ Internship Recommendation Engine.
- ❖ Mentor Recommendation Engine.
- ❖ Mentorship Booking System.
- ❖ Company Recruitment Dashboard.

What is our Impact??!

- Smarter internship recommendations.
- Faster candidate screening for companies.
- Personalized mentor matching.
- Better career development opportunities.

Platform Users

Who We Serve

Students

- ✓ 3rd/4th year seeking internships
- ✓ Mentorship programs
- ✓ Career preparation

Mentors

- ✓ Industry professionals
- ✓ Give back to community
- ✓ Share expertise

Companies

- ✓ HR & recruiters
- ✓ Seeking qualified interns
- ✓ Streamlined hiring

Personas

Maher

Computer Science Student

Goal

Land Summer internship at tech company

Pain Point

"Applied to 10+ Internship, heard nothing back"

CV Parser — How It Works

1

Text Extraction

pdfplumber for PDF · python-docx for DOCX
Supports any resume format

2

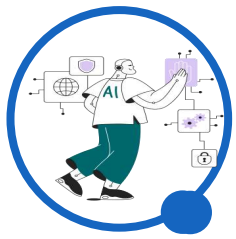

NLP Extraction (spaCy)

Skills via fine-tuned NER model
Location via GPE/LOC entities
Experience via keyword heuristics

3

LLM Formatting (Groq)

LLaMA 3.3 70B cleans & structures output
Enforces strict JSON schema
~2 second total response time

CV Parser — Live API Demo

Deployed on Hugging Face · `POST /parse_resume` · 200 OK in 2.15s

REQUEST (form-data upload)

POST `https://nadinekhald500-cv-parser-api.hf.space/parse_resume`

Body: `form-data`

Key	Value	Description
☒ file	File <code>resume.pdf</code>	
☒ user_id	Text <code>2</code>	

RESPONSE (structured JSON)

```

CV Parser — Dataset & Discussion

Dataset Used

The CV Parser was tested using resumes collected from:

- Team members
- Colleagues
- Different online sources
- Various CV templates & structures
- PDF and DOCX formats

Evaluated on real-world resumes with different layouts and writing styles.

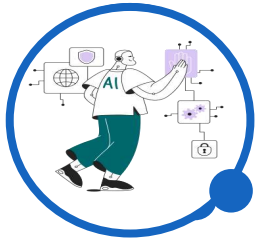

Discussion Questions

- ? **Why Two Stages (NER + LLM)?**
- ? **Why a Dedicated Skill Extractor?**

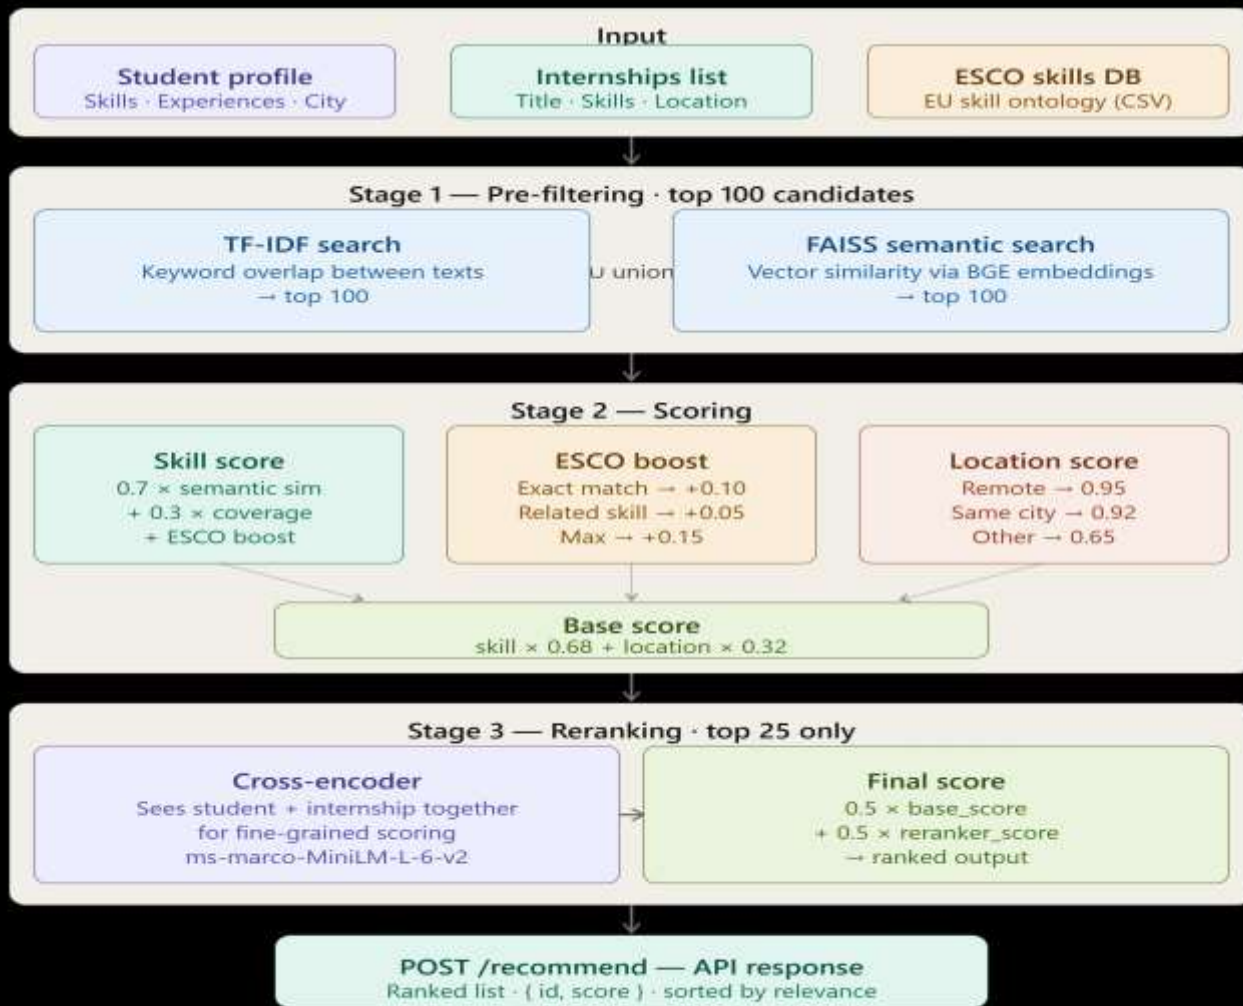

Key Discussion Topic

Why is CV Parsing Important?

Internship Recommender — How It Works

1

Pre-Filtering (top 100)

TF-IDF keyword search U FAISS semantic search
BGE bi-encoder embeddings · fast candidate pool

2

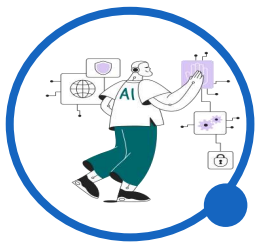

Multi-Signal Scoring

Skill score ($0.7 \times \text{semantic} + 0.3 \times \text{coverage} + \text{ESCO boost}$)
Location score · Base = $\text{skill} \times 0.68 + \text{location} \times 0.32$

3

Neural Reranking (top 25)

ms-marco-MiniLM-L-6-v2 cross-encoder
Final = $0.5 \times \text{base} + 0.5 \times \text{reranker}$ → ranked output

Internship Recommender — Live API Demo

Internship Recommender — Dataset & Discussion

Dataset Used

No suitable Egyptian dataset was found. Starting point:

SL IT Jobs Dataset (Kaggle)

<https://www.kaggle.com/datasets/miyurusanjana/sl-it-jobs-dataset>

Adapted for InternWay by:

- Replacing locations with Egyptian governorates
- Adjusting company information
- Cleaning and refining skills data
- Converting job roles to internship names

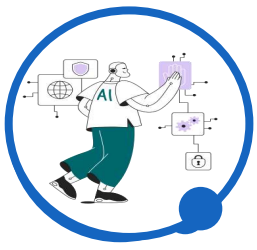

Discussion Questions

- ? Why Hybrid Retrieval?
- ? Why Two-Stage Ranking?
- ? Why ESCO Ontology?
- ? Why FAISS?
- ? Why BAAI/bge-base-en-v1.5?

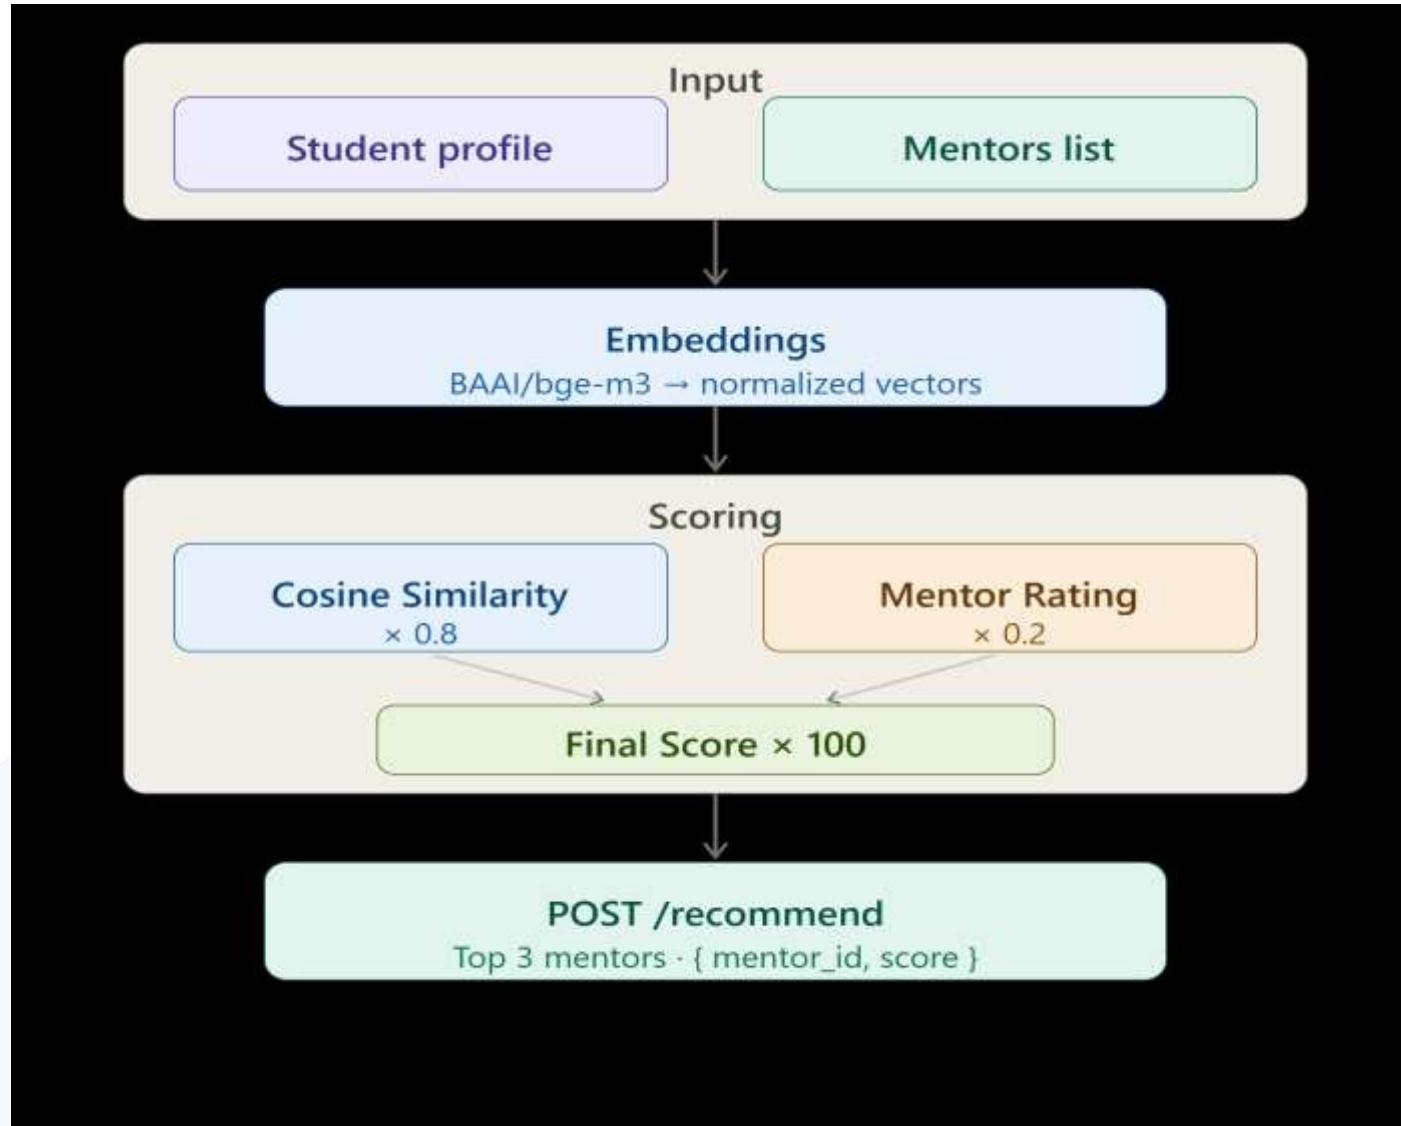

Key Discussion Topic

Why is Internship Recommendation Important?

Mentor Recommender — How It Works

1

Embeddings Generation

BAAI/bge-m3 model encodes student profile
Mentor profiles encoded as normalized vectors

2

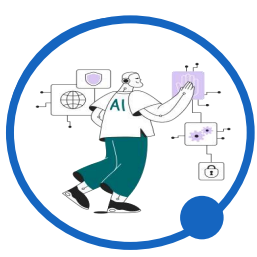

Cosine Similarity Scoring

Semantic similarity between student and mentor vectors
Weighted: $\text{Cosine sim} \times 0.8 + \text{Mentor rating} \times 0.2$

3

Final Score & Ranking

Final score = $(\text{cosine} \times 0.8 + \text{rating} \times 0.2) \times 100$
Returns top 3 mentors with **mentor_id** and score

Mentor Recommender — Live API Demo

Back-End

Back-End

Back-End

The screenshot shows a web browser window with a REST client interface. The browser's address bar displays the URL `https://21mcv6z8-5022.euw.devunnels.ms/Student/Dashboard`. The REST client interface has a 'GET' method selected for the same URL. The 'Authorization' tab is active, showing 'Bearer Token' as the auth type and a masked token field. Below this, a message states: 'The authorization header will be automatically generated when you send the request. Learn more about [Bearer Token](#) authorization.'

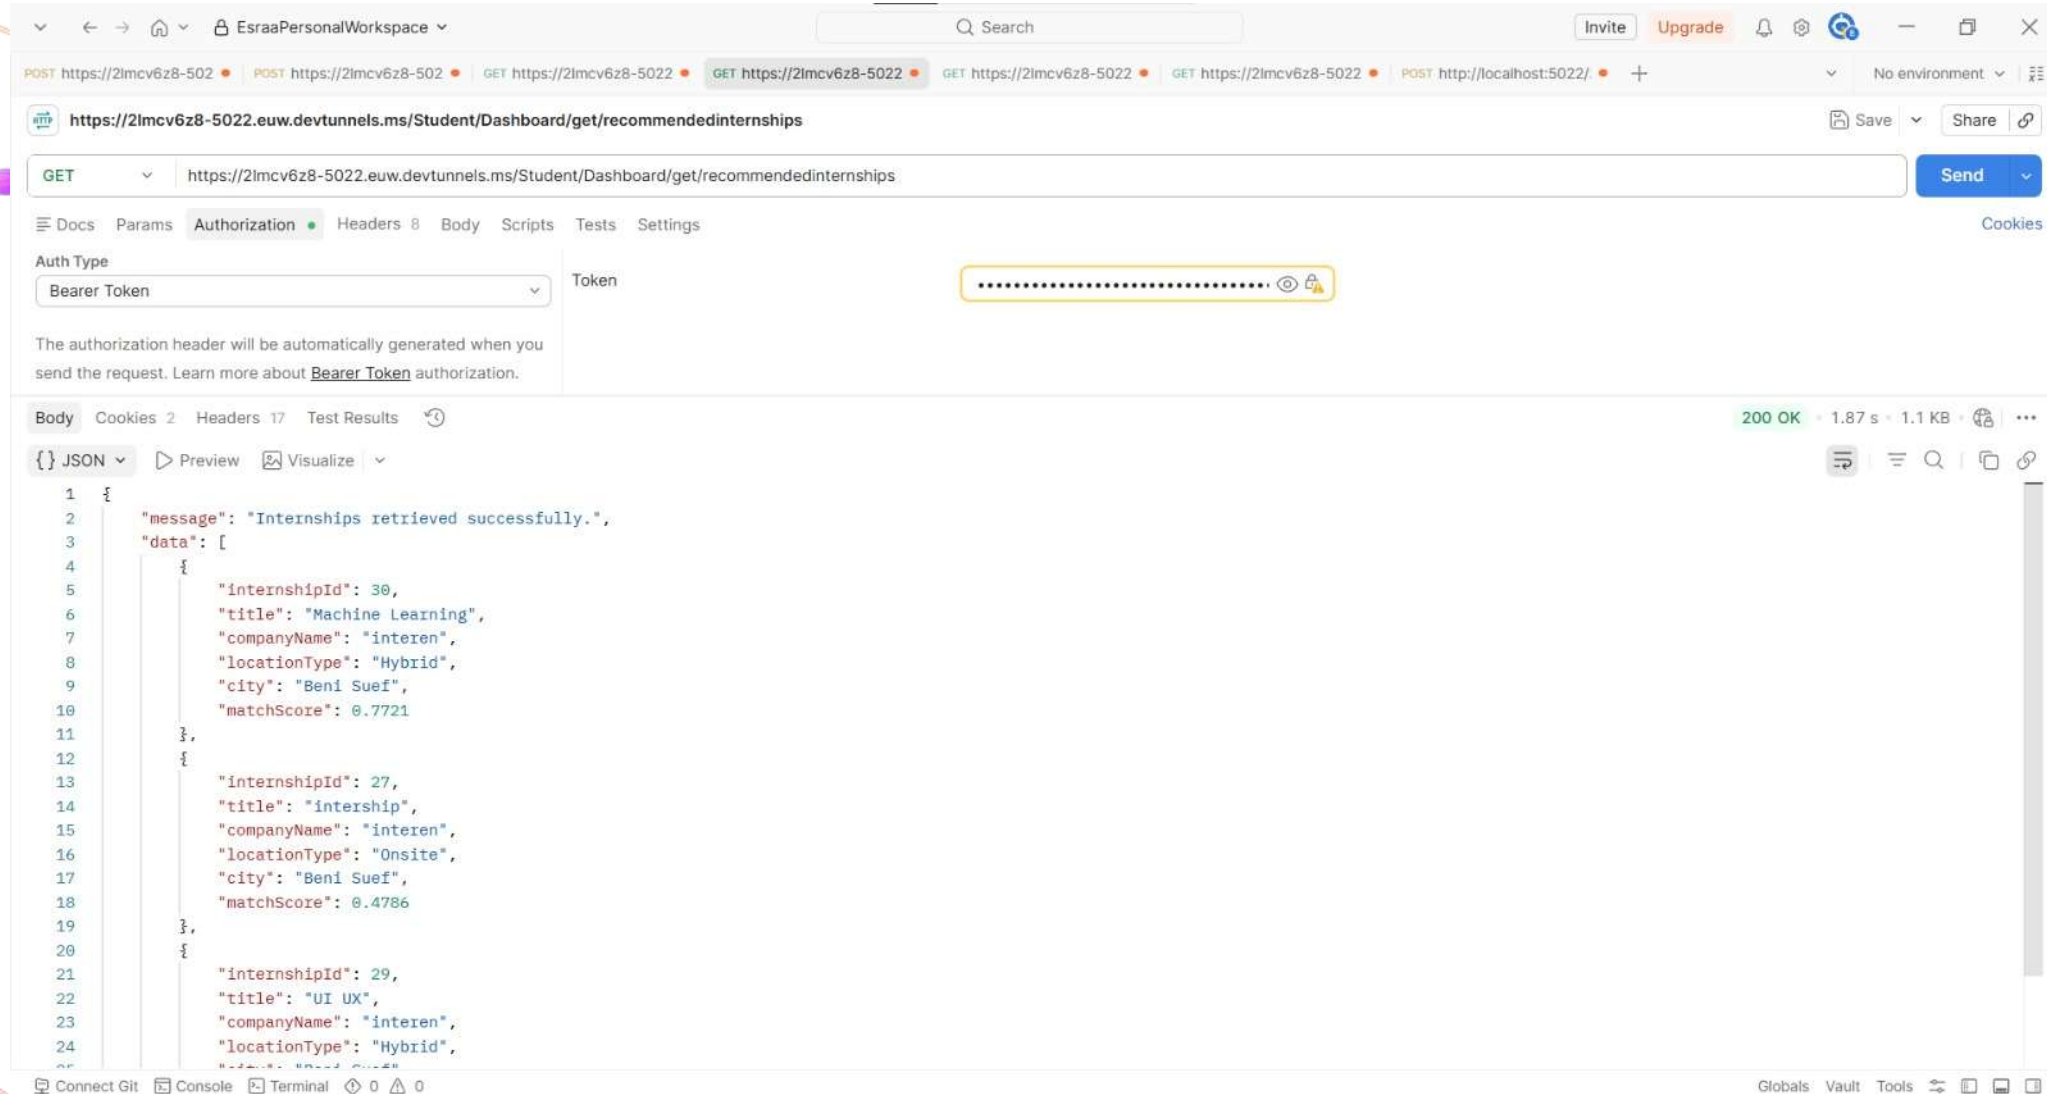

The 'Body' tab is selected, showing a JSON response:

```
{
  "message": "Dashboard is retrieved successfully .",
  "data": {
    "numAppliedInternships": 0,
    "numBookingSession": 0,
    "upcomingSessionDate": null
  }
}
```

The status bar at the bottom right of the REST client indicates a '200 OK' response with a response time of '3.00 s' and a size of '1.91 KB'. The bottom of the browser window shows tabs for 'Connect DB', 'Console', and 'Terminal'.

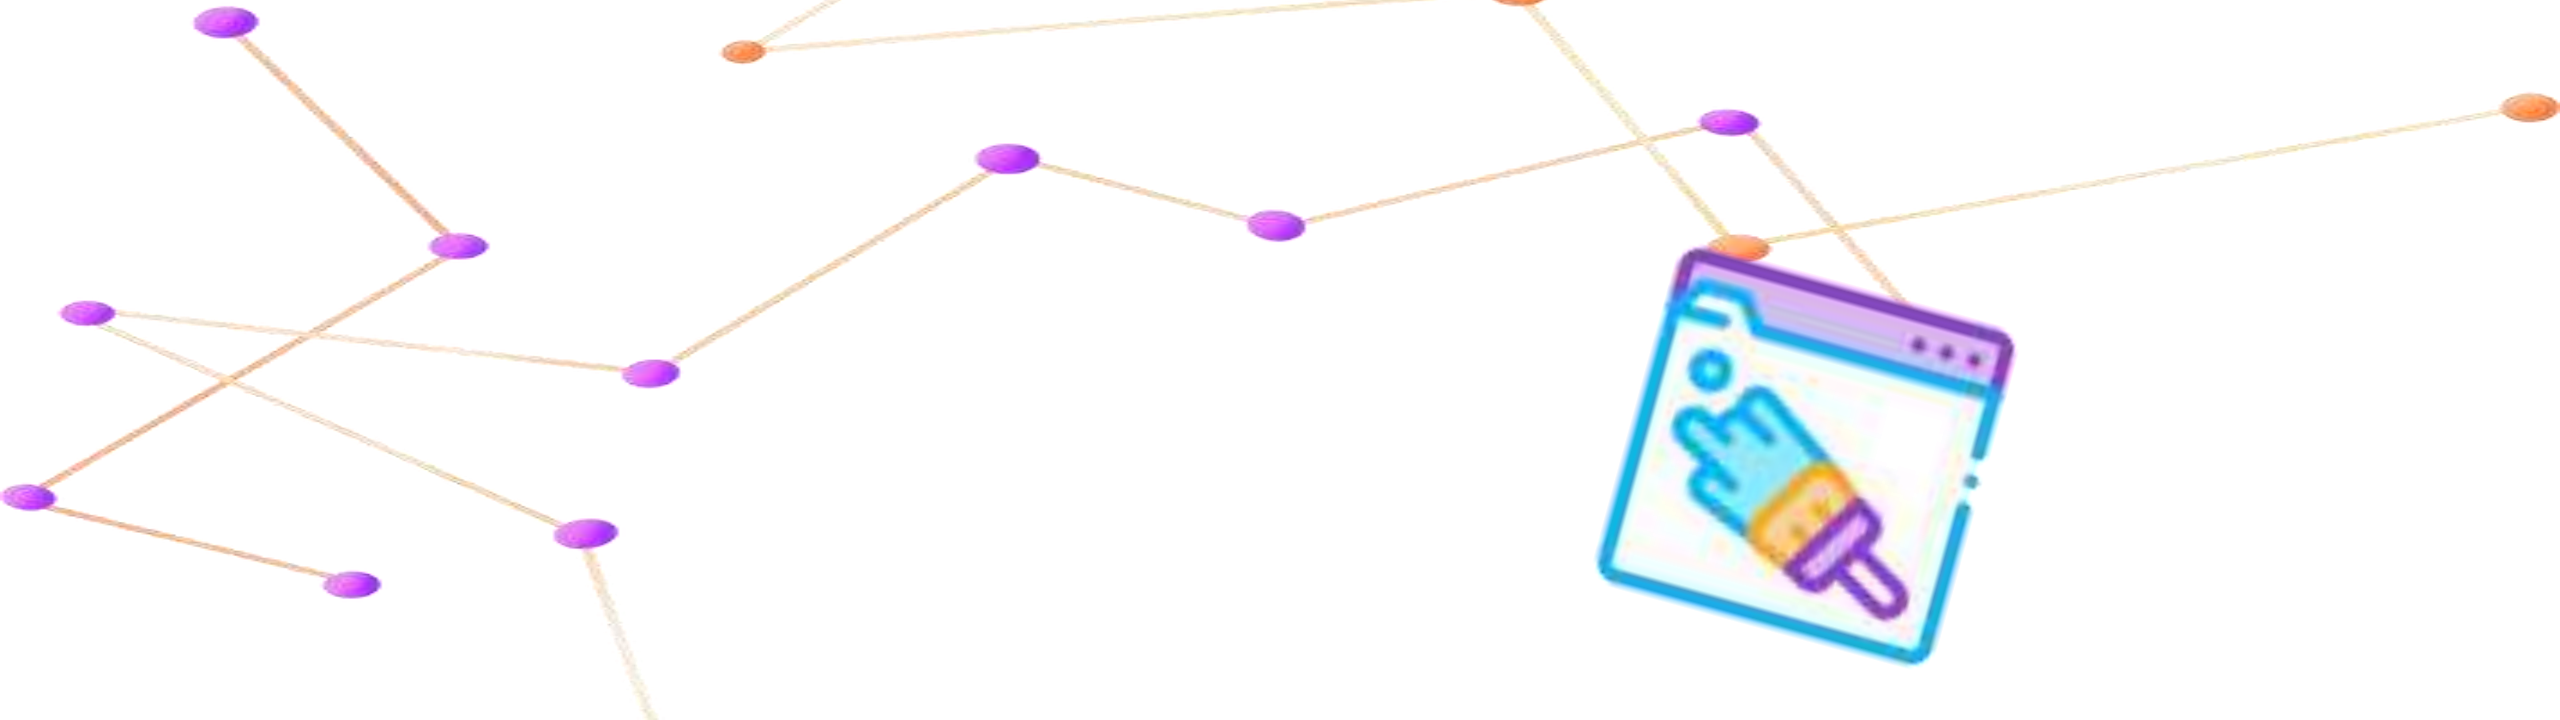

Back-End

The screenshot shows a REST client interface with the following details:

- URL:** `https://2lmcv6z8-5022.euw.devtunnels.ms/Student/Dashboard/get/recommendedinternships`
- Method:** GET
- Auth Type:** Bearer Token
- Token:** [Redacted]
- Status:** 200 OK
- Response Body (JSON):**

```
